IRCDL 2018

14TH ITALIAN RESEARCH CONFERENCE ON DIGITAL LIBRARIES

UDINE - JANUARY 25-26, 2018

Aims and Scope

Since 2005, the Italian Research Conference on Digital Libraries has served as an important national forum focused on digital libraries and related technical, practical, and social issues. IRCDL encompasses the various facets of the term "digital libraries", including new forms of information institutions; operational information systems with multimodal digital content; new means of selecting, collecting, organizing, and distributing digital content; and theoretical models of information media, including document genres and electronic publishing. Digital libraries may be viewed as a new form of information institution or as an extension of the services currently provided by libraries.

Representatives from academia, government, industry, and others are invited to participate in this annual conference. The conference draws from a broad and multidisciplinary array of research areas including computer science, information science, librarianship, archival science and practice, museum studies and practice, technology, social sciences, cultural heritage and humanities.

Topics include but are not limited to:
- Multimedia digital libraries
- Formal and methodological foundations of digital libraries
- Digital libraries architectures and infrastructures
- Web intelligence and digital libraries
- Algorithms and techniques for automatic content analysis
